# Almir Cilasevic

Sydney, NSW | Australian Citizen | LinkedIn | Portfolio | GitHub
**Security & Risk Professional | Junior in Tech, Senior in Professionalism**

## PROFESSIONAL SUMMARY

Security+ (SY0-701) certified with a UNSW Graduate Certificate, executing a deliberate career pivot into Cybersecurity. I offer a unique profile: the technical hunger of a career-changer combined with 11 years of professional maturity in risk, audit, and investigations. Having managed sensitive PII at Credit Corp and led risk hardening at David Jones, I am adept at bridging the gap between technical vulnerabilities and executive-level risk communication. I am seeking to apply my investigative rigour to protect critical infrastructure.

## TECHNICAL SKILLS

- **Frameworks & GRC:** ACSC Essential Eight, NIST CSF, ISO 27001, ASD ISM, PSPF, OWASP Top 10.
- **Cloud & Development: Microsoft Azure** (Static Web Apps), **Cursor AI**, HTML/CSS, GitHub Actions (CI/CD), Git version control.
- **Security Tools:** Splunk (SIEM), Nessus, Nmap, Burp Suite, Wireshark, Metasploit, Autopsy, Snort.
- **Infrastructure:** Windows Server Admin, Linux CLI (Ubuntu/Kali), Active Directory (AD) Security, TCP/IP Networking.
- **Core Competencies:** Vulnerability Management, OSINT, Incident Reporting, Risk Hardening, Stakeholder Engagement.

## EDUCATION & CERTIFICATIONS

**CompTIA Security+ (SY0-701)** *Issued 2025* | **Graduate Certificate in Cybersecurity** University of New South Wales (UNSW) | **Cybersecurity Bootcamp** University of Sydney (via edX)

## SELECTED CYBERSECURITY PROJECTS

**Technical Showcase Portfolio (Azure & GitHub)**

- Engineered and deployed a professional portfolio using **Azure Static Web Apps** and **GitHub Actions** for automated CI/CD.
- Hardened the site's security posture by implementing custom headers and metadata according to **OWASP web security standards**.
- Developed front-end components using **Cursor AI**, integrating modern AI-assisted development workflows to ensure code efficiency and security.

**SIEM Incident Analysis & Dashboarding (Splunk)**

- Orchestrated a simulated SOC environment to monitor and **analyse** attack logs using **Splunk (Security Information and Event Management)**.
- Engineered custom dashboards to visualise attack patterns and drafted formal incident reports detailing remediation steps.

**Vulnerability Assessment & AD Attack Simulation**

- Executed end-to-end penetration testing simulations using **Nessus** and **Nmap** for reconnaissance.
- Utilised **Metasploit** to simulate Active Directory (AD) attacks in a controlled lab environment, identifying and patching lateral movement vulnerabilities.

## PROFESSIONAL EXPERIENCE

**Customer Relationship Manager | Credit Corp** *Parramatta, NSW | Nov 2022 – Present*

- **High-Performance Delivery:** Consistently exceeded performance KPIs and incentive targets (7/12 months), demonstrating the discipline and result-orientation required for fast-paced consulting environments.
- **Advanced OSINT & Investigation:** Utilise sophisticated skip-tracing techniques and Open-Source Intelligence (OSINT) to verify data and locate high-value assets across diverse third-party networks.
- **Conflict Resolution & Negotiation:** Manage complex, high-pressure negotiations and dispute resolutions, mirroring the stakeholder management skills needed when communicating technical risks to business owners.

**Asset & Profit Protection Manager | David Jones** *Multiple Locations, NSW | Oct 2014 – Oct 2022*

- **Internal Consulting & Audit:** Led 8 years of operational security audits, identifying systemic vulnerabilities and implementing hardening protocols to mitigate loss and fraud.
- **Investigations & Forensics:** Conducted deep-dive investigations into complex fraud cases, applying evidence-gathering and chain-of-custody methodologies directly transferable to Digital Forensics.
- **Strategy & Training:** Authored and delivered security training to 100+ employees, effectively communicating risk-reduction strategies to both technical and non-technical staff.
